Profile

Aspiring Frontend Developer with solid knowledge of HTML, CSS, and JavaScript, and hands-on experience using React and Angular to build responsive and dynamic user interfaces. Passionate about clean UI design and user-centered development. Quick learner with strong attention to detail, eager to explore modern frameworks, and thrive in collaborative, fast-paced environments.

Education

BSc in Computer Science
Minia University – Info Systems Dept | Graduated: 2024

Egyptian Health Insurance (Graduation Project):

- Spearheaded the development of a web application to streamline health insurance processes
- Utilized Bootstrap, JavaScript, and RESTful APIs to create an interactive and user-friendly interface.

Improved data accessibility by 30% through real-time dashboards and analytics.

Internships

• Front-End & Cross-Platform Mobile Development Information Technology Institute (ITI) | Mar – Jul 2025

Clinic Management System (Graduation project):

Developed a full-stack medical appointment management system with role-based access for doctors, assistants, and patients, including real-time chat, appointment booking, and payment options (cash/visa)."

• Web Design Training

National Telecommunication Institute (NTI) | Jun – Sep 2024

Dental Clinics Center (Graduation project):

- Developed a robust booking platform with automated scheduling and feedback mechanisms.
- Increased appointment scheduling efficiency by 40%, minimizing administrative workload.
- Enhanced user satisfaction by implementing intuitive navigation and accessibility features.

Skills

Technical Skills:

HTML, CSS, JS, React, Angular, React Native, Dart, Flutter
Firebase, Node.js, Git, GitHub, Bootstrap, Sass, jQuery

Personal Skills

Problem Solving, Teamwork, Time Management, Communication

Projects

The Movie App

modern and feature-rich Movie Web Application built with Angular 17, offering seamless user authentication, movie browsing, and personalized experiences. The app integrates with The Movie Database (TMDb) API to fetch real-time movie data, and includes both public and protected routes

Clothing E-Commerce Web App

Developed a full-featured, responsive online store using React and Vite. Integrated product filtering, cart and wishlist management, and secure form validation. Used Tailwind CSS for modern UI, Zod with React Hook Form for validation, and Axios for efficient API handling.

Products App – Angular E-Commerce Platform

Built a dynamic and responsive e-commerce web app using Angular and Bootstrap. Implemented product listing with pagination, product detail view, and a complete shopping cart system with authentication. Used TypeScript and DummyJSON API to handle structured data and ensure

E-Commerce Web App (Vanilla JS)

Developed a full-featured e-commerce system using only HTML, CSS, and Vanilla JavaScript. Included admin/customer roles, login/register with validation, product & order management, wishlist, and cart using LocalStorage. Integrated Stripe Sandbox for payments and ensured responsive, accessible UI.
